3 LETTERS "P" TO MAKE A HAPPY SCHOOL

SCENE 1:

Tam: Hello. My name is Thanh Tam.

Lap: Hi. I'm Quoc Lap

Tinh: Hello. I am Minh Tinh.

All: We come from Cao Ba Quat Upper-Secondary school.

Tinh: Located in Nui Thanh district, Quang Nam province, our school was built in 1998 and is recognized as a national standard school.

Lap: Our school has trained a lot of outstanding students who have entered many prestigious universities. In 2018, we celebrated the 20th anniversary and welcomed thousands of teachers and students back to school.

Tam: Cao Ba Quat is always by our side. It is not only a warm and sweet home but also a happy school.

Lap: I wonder what factors contribute to make a happy school.

Tinh: According to the UNESCO “**The elements referring to 3 letters P make a happy school.**”

Lap: Certainly. So now, let's discover the **3 letters P**, and take our school as an example. The first letter **P** is **People**.

SCENE 2:

Tam: That's right. At CBQ high school, it is the dedicated teachers that wake our every hidden abilities up. Apart from the knowledge of lessons, we can be taught how to have good manners and how to overcome difficulties in life. Teachers give us precious gems which contain their love and experiences.

Here, we also have many friends who share our ups and downs and spend time at school together. We learn from friends a lot as they help us realize our shortcomings and strengths to study better.

Especially, the people in charge of making our school cleaner, safer and more beautiful- the guardians and the laborer always create a good impression on anyone visiting our school. They are truly friendly and sociable.

So as you can see, everyone at my school shares the responsibility to build a community of love, coziness and respect.

Next, what is the second letter **P** about?

SCENE 3:

Lap: Can you guess?

The second letter **P** is **Process**.

Besides teaching and learning, extracurricular activities and exciting emulation movements also contribute to the comprehensive development of students in all aspects.

Through the annual sports activities, we can easily realize enthusiasm, determination and solidarity among students. In addition, scientific and technological creativity or recycling competitions give us a lot of chances to widen our knowledge.

Last November 20th, my school organized a painting competition and the pictures were the combination of students' talent and love. Thanks to this occasion, students expressed their gratitude and respect to teachers.

We can't deny the importance of school activities to each individual student. Actually it's a necessary environment to develop students' potential fully. Right?

SCENE 4:

Tinh: Yes. It's also the foundation of the third letter **P: Place**....

Cao Ba Quat high school provides a safe and secure environment for us to study better and enjoy happiness. Students are fully developed in a friendly place where there is no violence, no isolation and no tension. Here, we are in the love, care and protection of managers, teachers and friends.

Welcome to our classroom! It is green, spotless, beautiful and well-equipped. The other place I want to introduce to you is the school's library which is a wonderful destination for us to discover valuable knowledge.

Wow! I really enjoy fresh air and green trees in this spacious schoolyard. Yeah let's join my friends. They are singing happily. Take a picture to keep this unforgettable moment!

SCENE 5:

Lap: **People, Process** and **Place** are three main factors to build a friendly environment and happy atmosphere at the happy school.

Tam: The schooldays we spend will be the most memorable time in our life.

All: Cao Ba Quat - A HAPPY SCHOOL - is always in our hearts !
